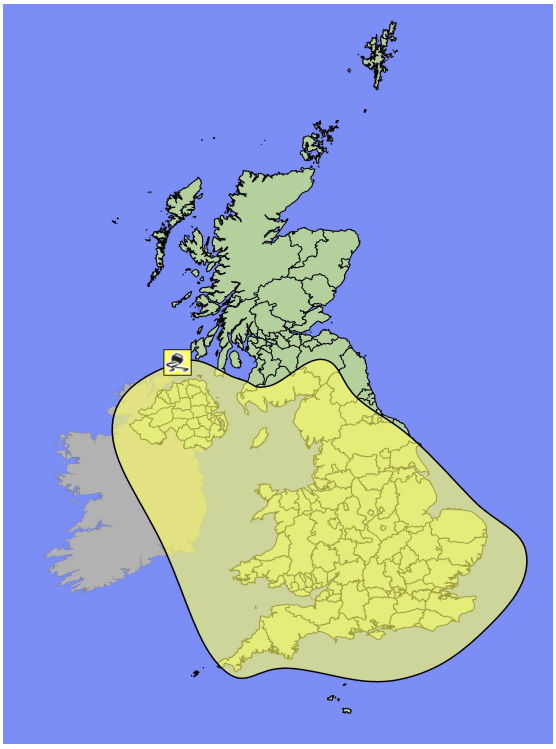
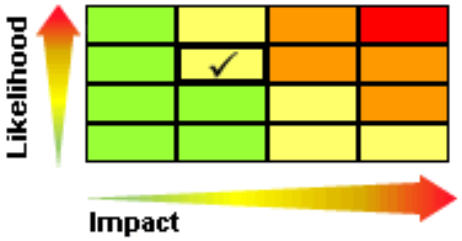
National Severe Weather Warning Service





Chief Forecasters Assessment
The wintry weather will continue through the weekend, albeit in a less severe form. The continuing low temperatures will mean that lying snow will remain, and ice will become more of a problem.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Sat, 19th Jan 2013** until **12:00 on Sun, 20th Jan 2013**

Although some further slight snowfalls are likely, with 1 to 2 cm of fresh snow in a few places, the focus switches to ice, with near or sub-zero temperatures persisting quite widely. This is particularly the case over existing snow cover, where some very low night-time temperatures are possible, should skies clear.

The public should be aware of the risk of localised difficult travel conditions due either to existing snow cover, or to icy surfaces.
